# Connecting to an automated gate

N/C contact from gate/lock
timer relay

This example shows the automated gate controller requiring a Normally Closed
contact, however, if a Normally Open contact is required then simply use the N/O
connection on the gate/lock timer relay board shown

Common or L1

PRESS TO

EXIT

Normally Open or L2

240v
AC

S- from door
panel to VT

S1+ from door
panel to VT

Please Note: You will
require the larger PS5
power supply as illustrated

N/C contact from gate/lock timer relay

To gate controller relay switch
