

The diagram illustrates the electrical connections for a door lock system. It includes a door panel with a lock release, a transformer, and a power supply unit. The connections are as follows:

- Door Panel:** The lock release is connected to the transformer. The transformer is connected to the power supply unit.
- Transformer:** The transformer is connected to the power supply unit. The power supply unit is connected to the transformer.
- Power Supply Unit:** The power supply unit is connected to the transformer. The transformer is connected to the power supply unit.

Notes:
The lock release must be 12v dc and rated at no more than 300 to 360ma otherwise an additional 12v dc power supply will be required

The lock release must be 12v dc and rated at no more than 300 to 360ma otherwise an additional 12v dc power supply will be required
