#### Add a User PIN or add a key fob for the first time

Always make a note of the User ID's when adding a User PIN or key fobs

Star \*(Master Code 123456) # Hash

Enter 1 (Then enter the first User ID which will be 1) # (Enter your PIN or present key fob) # \* To exit or continue adding prior to pressing the \* button

## Adding a second or third User PIN or key fob

Note the User ID MUST be the next sequential number Star \*(Master Code 123456) # Hash

**Second user** Enter 1 (Then enter the next User ID which will be 2) # (Enter your PIN or present key fob) #

\* To exit

**Third user** Enter 1 (Then enter the next User ID which will be 3) # (Enter your PIN or present key fob) #

\* To exit

## Delete a User PIN or key fob

Star \*(Master Code 123456) # Hash 2 (Enter the User ID) # \* To exit

## Change a User PIN (No need to enter program mode for this)

Star \*(User ID#) (Old PIN #) (New PIN #) (New PIN #)

# **Delete all PINs or key fobs**

\*(Master Code 123456) # 20000 #

\* To exit

#### **Reset to Factory Default:**

This will reset the K401-EW to factory default but all card/PIN information will still be retained

- 1. Power the K401-EW down
- 2. Press and hold the \* button and power up the K401-EW
- 3. There will be two bleeps. Then release the \* button, after a second there will be one more bleep to confirm reset
